设计灵感：这座影剧院建筑的设计理念受到当地的海洋捕鱼文化，以及流水的自然风貌的启发，创造出一系列的流动的形体。各个形体如同独立的岛屿，仅有空中的桥梁相连接，这样保持了每个功能空间的独立而又成为整体。

Design inspiration： This theater building design by the local marine fishing culture and natural beauty inspired by water, creating a series of flowing form. Each body as separate islands, the only bridge connecting the air, so to maintain the independence of each functional space but as a whole .
